

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (original) An additive for a non-aqueous electrolyte in a battery composed of a phosphazene compound represented by the following formula (I):
$$(\text{NPX}_2)_n \cdots (\text{I})$$

(wherein Xs are independently a halogen element, and n is an integer of 3-15) and containing at least two kinds of halogen elements.
2. (original) An additive for a non-aqueous electrolyte in a battery according to claim 1, wherein the phosphazene compound contains fluorine and chlorine.
3. (original) An additive for a non-aqueous electrolyte in a battery according to claim 2, wherein Xs in the formula (I) are independently fluorine or chlorine.
4. (original) An additive for a non-aqueous electrolyte in a battery according to claim 1, wherein n in the formula (I) is 3-5.
5. (original) An additive for a non-aqueous electrolyte in a battery according to claim 3 or 4, wherein n in the formula (I) is 3, and one to three of six Xs is chlorine and the others are fluorine.
6. (original) An additive for a non-aqueous electrolyte in a battery according to claim 3 or 4, wherein n in the formula (I) is 4, and one to five of eight Xs is chlorine and the others are fluorine.

7. (currently amended) An additive for a non-aqueous electrolyte in a battery according to claim 5-~~or~~6, wherein the phosphazene compound contains at least two chlorine atoms in its molecule, and each of the chlorine atoms is bonded with a different phosphorus atom, respectively.

8. (original) An additive for a non-aqueous electrolyte in a battery according to claim 1, wherein the phosphazene compound has a freezing point of not more than -5°C.

9. (currently amended) A non-aqueous electrolyte for a battery comprising an additive for a non-aqueous electrolyte in a battery as claimed in ~~any one of claims 1-8~~ claim 1, an aprotic organic solvent and a support salt.

10. (original) A non-aqueous electrolyte for a battery according to claim 9, wherein a difference of a boiling point between the aprotic organic solvent and the additive for the non-aqueous electrolyte in the battery is not more than 25°C.

11. (currently amended) A non-aqueous electrolyte battery comprising a non-aqueous electrolyte for a battery as claimed in claim 9-~~or~~10, a positive electrode and a negative electrode.
